

I have been a professional truck driver for 28 years serving the public by delivering goods in all weather conditions when no other people would dare to be out, giving up & missing out on a family life only to see others enjoying theirs. That's commitment! at last a service like XM RADIO comes along that is committed to give me the service I need & pay for and that's not right? It's clear that FM radio has nothing but trash broadcasting on-just check your own records!!! & AM radio is not worth a hoot unless your local. I think the FCC should reject the NAB'S petition 04-160. I think XM RADIO provides an important tool to the professional driver! It has been long awaited service and a welcomed companion to me & millions of other forgotten drivers that keep this country moving.
